

PE-500 2000x1000x50 mm röd

Artikelnr P1400467  
Material PE

1. Tekniskt datablad

| Egenskap                                   | Värde            | Enhet               | Standard          |
|--------------------------------------------|------------------|---------------------|-------------------|
| Density                                    | 1.3              | g/cm³               | DIN EN ISO 1183-1 |
| Tensile Strength                           | 24.2             | MPa                 | DIN EN ISO 527    |
| Modulus of elasticity (tensile)            | 1100             | MPa                 | DIN EN ISO 527    |
| Break Elongation                           | 138.75           | %                   | DIN EN ISO 527    |
| Melting point                              | 132.5            | °C                  | ISO 11357-3       |
| Maximal operating temperature (short-term) | 80               | °C                  |                   |
| Maximum Operating Temperature              | 54               | °C                  |                   |
| Minimum temperature                        | -100             | °C                  |                   |
| Vicat softening temperature (VST/B/50)     | 79               | °C                  | DIN EN ISO 306    |
| Dielectric Strength                        | 40               | kV/mm               | IEC 60243         |
| Volume Resistivity                         | 10 <sup>14</sup> | Ω                   | DIN EN 62631-3-1  |
| Dielectric Constant (1 MHz)                | 2.3              | -                   | IEC 60250         |
| Dielectric loss factor (1 MHz)             | 0.0              | -                   | IEC 60250         |
| Dielectric loss factor (100 Hz)            | 0.0              | -                   | IEC 60250         |
| Flammability Classification (UL 94)        | 3                |                     | UL 94             |
| Thermal Conductivity                       | 0.4              | W/(m·K)             | DIN 52612-1       |
| Surface Resistivity                        | ~10 <sup>8</sup> | Ω                   | DIN EN 62631-3-2  |
| Comparative Tracking Index (CTI)           | 600              | V                   | IEC 60112         |
| Water absorption to saturation             | 0.0              | %                   | DIN EN ISO 62     |
| Water Absorption to Saturation             | 0.0              | %                   | DIN EN ISO 62     |
| Notched impact strength (Charpy)           | 2                | kJ/m²               | DIN EN ISO 179    |
| Thermal Expansion Coefficient              | 2.4              | 10 <sup>-4</sup> /K | DIN 53752         |
| Hardness Shore D                           | 65               | ° Shore D           | DIN EN ISO 868    |
| Ball pressure hardness                     | 50               | MPa                 | ISO 2039-1        |

## 2. Kemisk beständighet

● Beständig   ● Delvis beständig   ● Ej beständig

| Kemikalie                             | Konc.        | Resultat |
|---------------------------------------|--------------|----------|
| 1,4-Dioxane                           | 100%         | ●        |
| 2-Hydroxypropionic Acid               | 90%          | ●        |
| Acetaldehyde                          | -            | ●        |
