

PMMA E 2050x1520x10 mm transparent

Artikelnr P1203055

● Beständig ● Delvis beständig ● Ej beständig

| Kemikalie               | Koncentration | Temp. | Beständighet |
|-------------------------|---------------|-------|--------------|
| Acetic acid             | 100%          | 20 °C | ●            |
| Acetone                 | 100%          | 20 °C | ●            |
| Ammonia                 | conc.         | 20 °C | ●            |
| Amyl alcohol            | -             | 20 °C | ●            |
| Apple juice             | -             | 20 °C | ●            |
| Benzene                 | -             | 20 °C | ●            |
| Butyl acetate           | -             | 20 °C | ●            |
| Calcium chloride        | -             | 20 °C | ●            |
| Carbon disulphide       | 100%          | 20 °C | ●            |
| Carbon tetrachloride    | -             | 20 °C | ●            |
| Chlorine gas            | 100%          | 20 °C | ●            |
| Chloroform              | -             | 20 °C | ●            |
| Citric acid             | 10%           | 20 °C | ●            |
| Cresol                  | -             | 20 °C | ●            |
| Cyclohexanone           | 100%          | 20 °C | ●            |
| Cyclohexene             | 100%          | 20 °C | ●            |
| Diesel                  | -             | 20 °C | ●            |
| Diethylene oxide        | -             | 20 °C | ●            |
| Ethyl acetate           | 100%          | 20 °C | ●            |
| Ethyl alcohol (ethanol) | 96%           | 20 °C | ●            |
| Ethylene chloride       | 100%          | 20 °C | ●            |
| Formaldehyde, aqueous   | 40%           | 20 °C | ●            |
| Formic acid             | 10%           | 20 °C | ●            |
| Fuel oil                | -             | 20 °C | ●            |
| Fuel, aromatic free     | -             | 20 °C | ●            |

| Kemikalie                        | Koncentration | Temp. | Beständighet |
|----------------------------------|---------------|-------|--------------|
| Glycerine                        | 100%          | 20 °C | ●            |
| Glycol                           | 100%          | 20 °C | ●            |
| Heptane                          | 100%          | 20 °C | ●            |
| Hydrochloric acid                | 10%           | 20 °C | ●            |
| Hydrochloric acid (concentrated) | conc.         | 20 °C | ●            |
| Hydrofluoric acid                | 40%           | 20 °C | ●            |
| Hydrogen peroxide                | 10%           | 20 °C | ●            |
| Hydrogen sulfide, aqueous        | -             | 20 °C | ●            |
| Isopropyl alcohol                | 100%          | 20 °C | ●            |
| Linseed oil                      | -             | 20 °C | ●            |
| Mercurochrome                    | -             | 20 °C | ●            |
| Methyl alcohol (methanol)        | 100%          | 20 °C | ●            |
| Methyl ethyl ketone (MEK)        | 100%          | 20 °C | ●            |
| Methylene chloride               | 100%          | 20 °C | ●            |
| Milk                             | -             | 20 °C | ●            |
| Mineral oils, aromatic free      | -             | 20 °C | ●            |
| Nitric acid                      | 10%           | 20 °C | ●            |
| Nitric acid (50%)                | 50%           | 20 °C | ●            |
| Nitrobenzene                     | -             | 20 °C | ●            |
| Oxalic acid                      | -             | 20 °C | ●            |
| Ozone (gas)                      | ≤ 0.5 ppm     | 20 °C | ●            |
| Paraffin oil                     | 100%          | 20 °C | ●            |
| Perchloroethylene                | -             | 20 °C | ●            |
| Petroleum                        | 100%          | 20 °C | ●            |
| Petroleum ether                  | 100%          | 20 °C | ●            |
| Phenol, aqueous                  | ca. 9%        | 20 °C | ●            |
| Phosphoric acid                  | 50%           | 20 °C | ●            |
| Potassium hydroxide solution     | 50%           | 20 °C | ●            |
| Premium fuel                     | -             | 20 °C | ●            |
| Silicone oil                     | -             | 20 °C | ●            |
| Sodium carbonate, aqueous        | -             | 20 °C | ●            |
| Sodium chloride, aqueous         | -             | 20 °C | ●            |
| Sodium hydrogen sulfite          | -             | 20 °C | ●            |
| Sodium hydroxide solution (60%)  | 60%           | 20 °C | ●            |

| Kemikalie                                | Koncentration | Temp. | Beständighet |
|------------------------------------------|---------------|-------|--------------|
| Sodium hydroxide solution (caustic soda) | 15%           | 20 °C | ●            |
| Sodium thiosulfate                       | -             | 20 °C | ●            |
| Sulphuric acid                           | 96%           | 20 °C | ●            |
| Tetrahydrofuran (THF)                    | 100%          | 20 °C | ●            |
| Toluene                                  | 100%          | 20 °C | ●            |
| Transformer oil                          | -             | 20 °C | ●            |
| Trichloroethylene                        | 100%          | 20 °C | ●            |
| Vinegar, standard                        | 5-10%         | 20 °C | ●            |
| Water                                    | -             | 20 °C | ●            |
| Xylene                                   | -             | 20 °C | ●            |
