| Kemikalie                             | Concentraci n | Temp. | Best ndighet |
|---------------------------------------|---------------|-------|--------------|
| 1,4-Dioxane                           | 100%          | 20  C | ●            |
| 2-Hydroxypropionic acid (lactic acid) | 90%           | 20  C | ●            |
| Acetaldehyde                          |               | 20  C | ●            |
| Acetic acid                           | 100%          | 20  C | ●            |
| Acetic acid                           | 100%          | 20  C | ●            |
| Acetic acid, aqueous                  | 70%           | 20  C | ●            |
| Acetic anhydride                      |               | 20  C | ●            |
| Acetone                               |               | 20  C | ●            |
| Acetone                               | 100%          | 20  C | ●            |
| Acronal dispersions                   |               | 20  C | ●            |
| Acrylonitrile                         |               | 20  C | ●            |
| Allyl acetate                         |               | 20  C | ●            |
| Allyl alcohol                         | 96%           | 20  C | ●            |
| Allyl chloride                        |               | 20  C | ●            |
| Aluminium chloride, aqueous           | any           | 20  C | ●            |
| Aluminium chloride, solid             |               | 20  C | ●            |
| Aluminium fluoride                    | Conc.         | 20  C | ●            |
| Aluminium hydroxide                   |               | 20  C | ●            |
| Aluminium metaphosphate               |               | 20  C | ●            |
| Aluminium sulphate, aqueous saturated |               | 20  C | ●            |
| Aluminium sulphate, solid             |               | 20  C | ●            |
| Ammonia                               | concentrated  | 20  C | ●            |
| Ammonia, gaseous                      |               | 20  C | ●            |
| Ammonia, liquid                       |               | 20  C | ●            |
| Ammonium chloride                     |               | 20  C | ●            |
| Amyl alcohol                          |               | 20  C | ●            |
| Aniline                               | any           | 20  C | ●            |

| Kemikalie                                | Concentraci3n     | Temp. | Best3ndighet |
|------------------------------------------|-------------------|-------|--------------|
| Anisole                                  | 3t                | 20 3C | ●            |
| Aqua regia                               | 3t                | 20 3C | ●            |
| Beer                                     | 3t                | 20 3C | ●            |
| Benzaldehyde, aqueous                    | any               | 20 3C | ●            |
| Benzene                                  | technically grade | 20 3C | ●            |
| Benzene                                  | 3t                | 20 3C | ●            |
| Benzoic acid, aqueous                    | any               | 20 3C | ●            |
| Benzyl alcohol                           | 3t                | 20 3C | ●            |
| Bitumen                                  | 3t                | 20 3C | ●            |
| Bleaching solution                       | 12.5 cl           | 20 3C | ●            |
| Boric acid                               | 100%              | 20 3C | ●            |
| Brake fluid                              | 3t                | 20 3C | ●            |
| Bromine, liquid                          | 100%              | 20 3C | ●            |
| Butanol, aqueous                         | any               | 20 3C | ●            |
| Butter                                   | 3t                | 20 3C | ●            |
| Butyl acetate                            | 3t                | 20 3C | ●            |
| Calcium chloride                         | 3t                | 20 3C | ●            |
| Calcium hypochlorite, aqueous suspension | any               | 20 3C | ●            |
| Camphor                                  | 3t                | 20 3C | ●            |
| Carbon disulphide                        | 100%              | 20 3C | ●            |
| Carbon disulphide                        | 3t                | 20 3C | ●            |
| Carbon tetrachloride                     | 3t                | 20 3C | ●            |
| Caustic soda (NaOH)                      | any               | 20 3C | ●            |
| Chlorine (gas)                           | 100%              | 20 3C | ●            |
| Chlorine, liquid                         | 3t                | 20 3C | ●            |
| Chloroacetic acid, aqueous               | 3%–85%            | 20 3C | ●            |
| Chlorobenzene                            | 100%              | 20 3C | ●            |
| Chlorobenzene                            | 3t                | 20 3C | ●            |
| Chloroform                               | technically grade | 20 3C | ●            |
| Chloroform                               | 3t                | 20 3C | ●            |
| Chromosulphuric acid                     | 3t                | 20 3C | ●            |
| Cider                                    | 3t                | 20 3C | ●            |
| Citric acid                              | 10%               | 20 3C | ●            |
| Citrus fruit juices                      | 3t                | 20 3C | ●            |

| Kemikalie                          | Concentraci3n | Temp. | Best3ndighet |
|------------------------------------|---------------|-------|--------------|
| Coconut oil                        | â€”           | 20 3C | ●            |
| Cod liver oil                      | â€”           | 20 3C | ●            |
