| Kemikalie            |       | Concentración | Temp. | Beständighet |
|----------------------|-------|---------------|-------|--------------|
| 1,4-Dioxane          | 100   | 60 °C         | ●     |              |
| 1,4-Dioxane          | 100   | 20 °C         | ●     |              |
| Acetic acid          | 100   | 20 °C         | ●     |              |
| Acetic acid          | 100   | 60 °C         | ●     |              |
| Acetic acid          | 100%  | 20 °C         | ●     |              |
| Acetone              | 100   | 60 °C         | ●     |              |
| Acetone              | 100   | 20 °C         | ●     |              |
| Ammonia              | conc. | 60 °C         | ●     |              |
| Ammonia              | conc. | 20 °C         | ●     |              |
| Apple juice          | -     | 20 °C         | ●     |              |
| Apple juice          | -     | 20 °C         | ●     |              |
| Benzene              | -     | 20 °C         | ●     |              |
| Benzene              | -     | 60 °C         | ●     |              |
| Bleaching solution   | -     | 20 °C         | ●     |              |
| Brake fluid          | -     | 60 °C         | ●     |              |
| Brake fluid          | -     | 20 °C         | ●     |              |
| Butyl acetate        | -     | 20 °C         | ●     |              |
| Butyl acetate        | -     | 60 °C         | ●     |              |
| Calcium chloride     | -     | 60 °C         | ●     |              |
| Calcium chloride     | -     | 20 °C         | ●     |              |
| Carbon disulphide    | 100   | 20 °C         | ●     |              |
| Carbon disulphide    | 100   | 60 °C         | ●     |              |
| Carbon tetrachloride | -     | 20 °C         | ●     |              |
| Carbon tetrachloride | -     | 60 °C         | ●     |              |
| Carbon tetrachloride | -     | 20 °C         | ●     |              |

| Kemikalie               | Concentración | Temp. | Beständighet |
|-------------------------|---------------|-------|--------------|
| Chlorobenzene           | 100%          | 20 °C | <div></div>  |
| Chlorobenzene           | 100           | 60 °C | <div></div>  |
| Chlorobenzene           | 100           | 20 °C | <div></div>  |
| Chloroform              | -             | 20 °C | <div></div>  |
| Chloroform              | -             | 60 °C | <div></div>  |
| Citric acid             | 10            | 20 °C | <div></div>  |
| Citric acid             | 10            | 60 °C | <div></div>  |
| Diesel                  | -             | 60 °C | <div></div>  |
| Diesel                  | -             | 20 °C | <div></div>  |
| Diethylene oxide        | -             | 20 °C | <div></div>  |
| Diethylene oxide        | -             | 20 °C | <div></div>  |
| Ethyl acetate           | 100           | 20 °C | <div></div>  |
| Ethyl acetate           | 100           | 60 °C | <div></div>  |
| Ethyl alcohol (ethanol) | 96            | 60 °C | <div></div>  |
| Ethyl alcohol (ethanol) | 96%           | 20 °C | <div></div>  |
| Ethyl alcohol (ethanol) | 96            | 20 °C | <div></div>  |
| Ethylene chloride       | 100           | 20 °C | <div></div>  |
| Ethylene chloride       | 100           | 60 °C | <div></div>  |
| Food oil                | -             | 60 °C | <div></div>  |
| Food oil                | -             | 20 °C | <div></div>  |
| Food oil                | -             | 20 °C | <div></div>  |
| Formic acid             | 10            | 20 °C | <div></div>  |
| Formic acid             | 10            | 60 °C | <div></div>  |
| Frost protection agent  | -             | 60 °C | <div></div>  |
| Frost protection agent  | -             | 20 °C | <div></div>  |
| Fuel oil                | -             | 20 °C | <div></div>  |
| Fuel oil                | -             | 60 °C | <div></div>  |
| Fuel, aromatic free     | -             | 20 °C | <div></div>  |
| Fuel, aromatic free     | -             | 60 °C | <div></div>  |
| Glycerine               | 100%          | 20 °C | <div></div>  |
| Glycerine               | 100           | 60 °C | <div></div>  |
| Glycerine               | 100           | 20 °C | <div></div>  |
| Glycol                  | 100           | 60 °C | <div></div>  |
| Glycol                  | 100           | 20 °C | <div></div>  |
| Heptane                 | 100           | 60 °C | <div></div>  |

| Kemikalie                        | Concentración | Temp. | Beständighet |
|----------------------------------|---------------|-------|--------------|
| Heptane                          | 100           | 20 °C | ●            |
| Hydrochloric acid                | conc.         | 20 °C | ●            |
| Hydrochloric acid                | 10            | 20 °C | ●            |
| Hydrochloric acid                | conc.         | 60 °C | ●            |
| Hydrochloric acid                | 10            | 60 °C | ●            |
| Hydrochloric acid (concentrated) | conc.         | 20 °C | ●            |
| Hydrofluoric acid                | 40            | 60 °C | ●            |
| Hydrofluoric acid                | 40%           | 20 °C | ●            |
| Hydrofluoric acid                | 40            | 20 °C | ●            |
| Hydrogen peroxide                | 10            | 60 °C | ●            |
| Hydrogen peroxide                | 10            | 20 °C | ●            |
| Hydrogen sulfide, aqueous        | -             | 20 °C | ●            |
| Isopropyl alcohol                | 100           | 20 °C | ●            |
| Isopropyl alcohol                | 100           | 60 °C | ●            |
| Isopropyl alcohol                | 100%          | 20 °C | ●            |
| Linseed oil                      | -             | 60 °C | ●            |
| Linseed oil                      | -             | 20 °C | ●            |
| Mercurochrome                    | -             | 20 °C | ●            |
| Methyl alcohol (methanol)        | 100           | 60 °C | ●            |
| Methyl alcohol (methanol)        | 100%          | 20 °C | ●            |
| Methyl alcohol (methanol)        | 100           | 20 °C | ●            |
| Methyl ethyl ketone (MEK)        | 100           | 20 °C | ●            |
| Methyl ethyl ketone (MEK)        | 100           | 60 °C | ●            |
| Methylene chloride               | 100           | 20 °C | ●            |
| Methylene chloride               | 100           | 60 °C | ●            |
| Milk                             | -             | 20 °C | ●            |
| Milk                             | -             | 60 °C | ●            |
| Mineral oils, aromatic free      | -             | 60 °C | ●            |
| Mineral oils, aromatic free      | -             | 20 °C | ●            |
| Nitric acid                      | 50            | 60 °C | ●            |
| Nitric acid                      | 10            | 20 °C | ●            |
| Nitric acid                      | 50            | 20 °C | ●            |
| Nitric acid                      | 10%           | 20 °C | ●            |
| Nitric acid                      | 10            | 60 °C | ●            |
| Paraffin oil                     | 100           | 60 °C | ●            |

| Kemikalie                                | Concentración | Temp. | Beständighet |
|------------------------------------------|---------------|-------|--------------|
| Paraffin oil                             | 100           | 20 °C | ●            |
| Perchloroethylene                        | -             | 20 °C | ●            |
| Perchloroethylene                        | -             | 60 °C | ●            |
| Petroleum                                | 100           | 20 °C | ●            |
| Petroleum                                | 100%          | 20 °C | ●            |
| Petroleum ether                          | 100           | 20 °C | ●            |
| Petroleum ether                          | 100%          | 20 °C | ●            |
| Petroleum ether                          | 100           | 60 °C | ●            |
| Phenol, aqueous                          | ca.9          | 20 °C | ●            |
| Phosphoric acid                          | 50            | 20 °C | ●            |
| Phosphoric acid                          | 50            | 60 °C | ●            |
| Potassium hydroxide solution             | 50            | 20 °C | ●            |
| Potassium hydroxide solution             | 50            | 60 °C | ●            |
| Premium fuel                             | -             | 20 °C | ●            |
| Premium fuel                             | -             | 60 °C | ●            |
| Propyl alcohol                           | -             | 60 °C | ●            |
| Propyl alcohol                           | -             | 20 °C | ●            |
| Silicone oil                             | -             | 20 °C | ●            |
| Silicone oil                             | -             | 60 °C | ●            |
| Sodium carbonate, aqueous                | -             | 60 °C | ●            |
| Sodium carbonate, aqueous                | -             | 20 °C | ●            |
| Sodium chloride, aqueous                 | -             | 60 °C | ●            |
| Sodium chloride, aqueous                 | -             | 20 °C | ●            |
| Sodium hydrogen sulfite                  | -             | 20 °C | ●            |
| Sodium hydrogen sulfite                  | -             | 60 °C | ●            |
| Sodium hydrogen sulfite                  | -             | 20 °C | ●            |
| Sodium hydroxide solution (caustic soda) | 60            | 60 °C | ●            |
| Sodium hydroxide solution (caustic soda) | 60            | 20 °C | ●            |
| Sodium hydroxide solution (caustic soda) | 15            | 20 °C | ●            |
| Sodium hydroxide solution (caustic soda) | 15            | 60 °C | ●            |
| Sodium nitrate, aqueous                  | -             | 20 °C | ●            |
| Sodium thiosulfate                       | -             | 20 °C | ●            |
| Sulphuric acid                           | 96            | 60 °C | ●            |
| Sulphuric acid                           | 96            | 20 °C | ●            |
| Tetrahydrofuran (THF)                    | 100           | 20 °C | ●            |

| Kemikalie             | Concentración | Temp. | Beständighet |
|-----------------------|---------------|-------|--------------|
| Tetrahydrofuran (THF) | 100           | 60 °C | <div></div>  |
| Toluene               | 100%          | 20 °C | <div></div>  |
| Toluene               | 100           | 60 °C | <div></div>  |
| Toluene               | 100           | 20 °C | <div></div>  |
| Transformer oil       | -             | 20 °C | <div></div>  |
| Transformer oil       | -             | 60 °C | <div></div>  |
| Trichloroethylene     | 100           | 60 °C | <div></div>  |
| Trichloroethylene     | 100           | 20 °C | <div></div>  |
| Vinegar, standard     | 5-10%         | 20 °C | <div></div>  |
| Vinegar, standard     | 5-10          | 20 °C | <div></div>  |
| Vinegar, standard     | 5-10          | 60 °C | <div></div>  |
