

PE-500 50x2000 mm natur

Artikelnr P2200620

● Beständig ● Delvis beständig ● Ej beständig

| Kemikalie                        | Konsentrasjon | Temp. | Beständighet |
|----------------------------------|---------------|-------|--------------|
| 1,4-Dioxan                       | 100%          | 20 °C | ●            |
| 2-Hydroxypropionic Acid          | 90%           | 20 °C | ●            |
| Acetaldehyd                      | -             | 20 °C | ●            |
| Acetic Acid                      | 100%          | 20 °C | ●            |
| Aceton                           | 100%          | 20 °C | ●            |
| Aceton                           | -             | 20 °C | ●            |
| Acronal-dispersjoner             | -             | 20 °C | ●            |
| Akrylonitril                     | -             | 20 °C | ●            |
| Allylacetat                      | -             | 20 °C | ●            |
| Allylalkohol                     | 96%           | 20 °C | ●            |
| Allylklorid                      | -             | 20 °C | ●            |
| Aluminiumfluorid                 | Conc.         | 20 °C | ●            |
| Aluminiumhydroxid                | -             | 20 °C | ●            |
| Aluminiumklorid, fast            | -             | 20 °C | ●            |
| Aluminiumklorid, vattenl.        | any           | 20 °C | ●            |
| Aluminiummetafosfat              | -             | 20 °C | ●            |
| Aluminiumsulfat, fast            | -             | 20 °C | ●            |
| Aluminiumsulfat, vattenl. måttad | -             | 20 °C | ●            |
| Ammoniak                         | concentrated  | 20 °C | ●            |
| Ammoniak, flytande               | -             | 20 °C | ●            |
| Ammoniak, gas                    | -             | 20 °C | ●            |
| Ammonium Chloride                | -             | 20 °C | ●            |
| Amyl Alcohol                     | -             | 20 °C | ●            |
| Anilin                           | any           | 20 °C | ●            |
| Anisol                           | -             | 20 °C | ●            |
| Apple Juice                      | -             | 20 °C | ●            |

| Kemikalie              | Konsentrasjon     | Temp. | Beständighet |
|------------------------|-------------------|-------|--------------|
| Bensen                 | -                 | 20 °C | <div></div>  |
| Bensen                 | technically grade | 20 °C | <div></div>  |
| Bensoesyra, vattenl.   | any               | 20 °C | <div></div>  |
| Bensylalkohol          | -                 | 20 °C | <div></div>  |
| Benzaldehyd, vattenl.  | any               | 20 °C | <div></div>  |
| Bitumen                | -                 | 20 °C | <div></div>  |
| Bleaching Solution     | 12.5 cl           | 20 °C | <div></div>  |
| Blekk                  | -                 | 20 °C | <div></div>  |
| Boric Acid             | 100%              | 20 °C | <div></div>  |
| Brake Fluid            | -                 | 20 °C | <div></div>  |
| Brom, flytande         | 100%              | 20 °C | <div></div>  |
| Bromvätesyra, vattenl. | 50%               | 20 °C | <div></div>  |
| Bränsle (aromatfritt)  | -                 | 20 °C | <div></div>  |
| Butanol, vattenl.      | any               | 20 °C | <div></div>  |
| Butyl Acetate          | -                 | 20 °C | <div></div>  |
| Calcium Chloride       | -                 | 20 °C | <div></div>  |
| Calcium carbonate      | -                 | 20 °C | <div></div>  |
| Calcium carbonate      | -                 | 20 °C | <div></div>  |
| Carbon Disulfide       | 100%              | 20 °C | <div></div>  |
| Carbon Tetrachloride   | -                 | 20 °C | <div></div>  |
| Caustic soda           | any               | 20 °C | <div></div>  |
| Cider                  | -                 | 20 °C | <div></div>  |
| Citric Acid            | 10%               | 20 °C | <div></div>  |
| Citrusfruktjuicer      | -                 | 20 °C | <div></div>  |
| Cyklohexan             | -                 | 20 °C | <div></div>  |
| Cyklohexanol           | -                 | 20 °C | <div></div>  |
| Cyklohexanon           | -                 | 20 °C | <div></div>  |
| Cyklohexanon           | 100%              | 20 °C | <div></div>  |
| Cyklohexen             | 100%              | 20 °C | <div></div>  |
| Dibutyleter            | -                 | 20 °C | <div></div>  |
| Dibutylftalat          | -                 | 20 °C | <div></div>  |
| Diesel Fuel            | -                 | 20 °C | <div></div>  |
| Diesel fuel            | -                 | 20 °C | <div></div>  |
| Diethylene Oxide       | -                 | 20 °C | <div></div>  |

| Kemikalie                                | Konsentrasjon | Temp.  | Beständighet |
|------------------------------------------|---------------|--------|--------------|
| Diglykolsyra, vattenl.                   | 30%           | 20 °C  | ●            |
| Dikloretan                               | -             | 20 °C  | ●            |
| Diklorättiksyra                          | -             | 20 °C  | ●            |
| Dimethyl formamide                       | -             | 20 °C  | ●            |
| Dimetylamin                              | -             | 20 °C  | ●            |
| Dioxan                                   | -             | 20 °C  | ●            |
| Eddik (standard)                         | 5-10%         | 20 °C  | ●            |
| Ethanol                                  | 10%           | 100 °C | ●            |
| Ethanol                                  | 10%           | 100 °C | ●            |
| Ethanol                                  | 10%           | 100 °C | ●            |
| Ethanol                                  | 10% v/v       | 20 °C  | ●            |
| Ethyl Acetate                            | 100%          | 20 °C  | ●            |
| Ethyl Alcohol                            | 96%           | 20 °C  | ●            |
| Ethylene Chloride                        | 100%          | 20 °C  | ●            |
| Etylacetat                               | -             | 20 °C  | ●            |
| Etylenalkohol                            | 96%           | 20 °C  | ●            |
| Etylendiamin                             | -             | 20 °C  | ●            |
| Etylenglykol                             | -             | 20 °C  | ●            |
| Etylenklorid                             | -             | 20 °C  | ●            |
| Fenol                                    | -             | 20 °C  | ●            |
| Fenol (vattenl.)                         | ≈9%           | 20 °C  | ●            |
| Ferrous (III) nitrate, aqueous saturated | -             | 20 °C  | ●            |
| Ferrous (III) sulfate, aqueous saturated | -             | 20 °C  | ●            |
| Food Oil                                 | -             | 20 °C  | ●            |
| Formaldehyd (vattenl.)                   | 40%           | 20 °C  | ●            |
| Formaldehyd, vattenl.                    | ≤40%          | 20 °C  | ●            |
| Formic Acid                              | 10%           | 20 °C  | ●            |
| Fosforsyra, vattenl.                     | 80% L 95%     | 20 °C  | ●            |
| Fosforsyra, vattenl.                     | 50%           | 20 °C  | ●            |
| Fosfortriklorid                          | -             | 20 °C  | ●            |
| Frigen 12 (Freon 12)                     | 100%          | 20 °C  | ●            |
| Frost Protection Agent                   | -             | 20 °C  | ●            |
| Fruktjuicer                              | any           | 20 °C  | ●            |
| Ftalsyra, vattenl.                       | 50%           | 20 °C  | ●            |

| Kemikalie                              | Konsentrasjon | Temp. | Beständighet |
|----------------------------------------|---------------|-------|--------------|
| Furfurol                               | -             | 20 °C | ●            |
| Fyringsolje                            | -             | 20 °C | ●            |
| Garvsyra (tannin), vattenl.            | 10%           | 20 °C | ●            |
| Glycerin                               | 100%          | 20 °C | ●            |
| Glycerin, aqueous                      | any           | 20 °C | ●            |
| Glykol                                 | 100%          | 20 °C | ●            |
| Glykol, aqueous                        | as supplied   | 20 °C | ●            |
| Glysantin                              | -             | 20 °C | ●            |
