| Kemikalie                        |     | Koncentration | Temp. | Best ndighet |
|----------------------------------|-----|---------------|-------|--------------|
| 1,4-Dioxan                       | 100 | 20  C         |       |              |
| 2-Hydroxipropionsyra (mj lksyra) | 90  | 20  C         |       |              |
| Aceton                           | 100 | 20  C         |       |              |
| Ammoniak                         |     | 20  C         |       |              |
| Ammoniumklorid                   |     | 20  C         |       |              |
| Amylalkohol                      |     | 20  C         |       |              |
| Bensen                           |     | 20  C         |       |              |
| Bensin (premium)                 |     | 20  C         |       |              |
| Borsyra                          | 100 | 20  C         |       |              |
| Bromsv tska                      |     | 20  C         |       |              |
| Br nsle, aromatfritt             |     | 20  C         |       |              |
| Butylacetat                      |     | 20  C         |       |              |
| Citronsyra                       | 10  | 20  C         |       |              |
| Cyklohexanon                     | 100 | 20  C         |       |              |
| Cyklohexen                       | 100 | 20  C         |       |              |
| Diesel                           |     | 20  C         |       |              |
| Dietylenoxid                     |     | 20  C         |       |              |
| Eldningsolja                     |     | 20  C         |       |              |
| Etylacetat                       | 100 | 20  C         |       |              |
| Etylalkohol (etanol)             | 96  | 20  C         |       |              |
| Etylenklorid                     | 100 | 20  C         |       |              |
| Fenol (vattenl.)                 | 9   | 20  C         |       |              |
| Fluorv tsesyra                   | 40  | 20  C         |       |              |
| Formaldehyd (vattenl.)           | 40  | 20  C         |       |              |
| Fosforsyra                       | 50  | 20  C         |       |              |
| Frostskyddsmedel                 |     | 20  C         |       |              |
| Glycerin                         | 100 | 20  C         |       |              |

| Kemikalie                          | Koncentration | Temp.  | Beständighet |
|------------------------------------|---------------|--------|--------------|
| Glykol                             | 100           | 20 Å°C | ●            |
| Heptan                             | 100           | 20 Å°C | ●            |
| Isopropylalkohol                   | 100           | 20 Å°C | ●            |
| Kalciumklorid                      | â€”           | 20 Å°C | ●            |
| Kaliumhydroxidl sning              | 50            | 20 Å°C | ●            |
| Klor (gas)                         | 100           | 20 Å°C | ●            |
| Klorbensen                         | 100           | 20 Å°C | ●            |
| Kloroform                          | â€”           | 20 Å°C | ●            |
| Koltetraklorid                     | â€”           | 20 Å°C | ●            |
| Linolja                            | â€”           | 20 Å°C | ●            |
| Matolja                            | â€”           | 20 Å°C | ●            |
| Merkurokrom                        | â€”           | 20 Å°C | ●            |
| Metylalkohol (metanol)             | 100           | 20 Å°C | ●            |
| Metylenklorid                      | 100           | 20 Å°C | ●            |
| Metyletylketon (MEK)               | 100           | 20 Å°C | ●            |
| Mineraloljor (aromatfria)          | â€”           | 20 Å°C | ●            |
| Mj lk                              | â€”           | 20 Å°C | ●            |
| Myrsyra                            | 10            | 20 Å°C | ●            |
| Natriumhydroxidl sning (natronlut) | 15            | 20 Å°C | ●            |
| Natriumhydroxidl sning (natronlut) | 60            | 20 Å°C | ●            |
| Natriumkarbonat (vattenl.)         | â€”           | 20 Å°C | ●            |
| Natriumklorid (vattenl.)           | â€”           | 20 Å°C | ●            |
| Natriumnitrat (vattenl.)           | â€”           | 20 Å°C | ●            |
| Natriumtiosulfat                   | â€”           | 20 Å°C | ●            |
| Natriumv tesulfid                  | â€”           | 20 Å°C | ●            |
| Nitrobensen                        | â€”           | 20 Å°C | ●            |
| Oxalsyra                           | â€”           | 20 Å°C | ●            |
| Ozon (gas)                         | â€”           | 20 Å°C | ●            |
| Paraffinolja                       | 100           | 20 Å°C | ●            |
| Perkloretylen                      | â€”           | 20 Å°C | ●            |
| Petroleum                          | 100           | 20 Å°C | ●            |
| Petroleumeter                      | 100           | 20 Å°C | ●            |
| Propylalkohol                      | â€”           | 20 Å°C | ●            |
| Pyridin                            | â€”           | 20 Å°C | ●            |

| Kemikalie             | Koncentration | Temp.  | Beständighet |
|-----------------------|---------------|--------|--------------|
| Salpetersyra          | 10            | 20 Å°C | ●            |
| Salpetersyra          | 50            | 20 Å°C | ●            |
| Saltsyra              | 10            | 20 Å°C | ●            |
| Saltsyra (konc.)      | â€”           | 20 Å°C | ●            |
