

## PET 1000x1000x3 mm svart

Artikelnr P1003718

● Beständig ● Delvis beständig ● Ej beständig

| Kemikalie            | Koncentration | Beständ. |
|----------------------|---------------|----------|
| 1,4-Dioxan           | 100           | ●        |
| 1,4-Dioxan           | 100           | ●        |
| Aceton               | 100           | ●        |
| Aceton               | 100           | ●        |
| Ammoniak             | conc.         | ●        |
| Ammoniak             | conc.         | ●        |
| Bensen               | —             | ●        |
| Bensen               | —             | ●        |
| Bensin (premium)     | —             | ●        |
| Bensin (premium)     | —             | ●        |
| Blekningslösning     | —             | ●        |
| Bromsvätska          | —             | ●        |
| Bromsvätska          | —             | ●        |
| Bränsle, aromatfritt | —             | ●        |
| Bränsle, aromatfritt | —             | ●        |
| Butylacetat          | —             | ●        |
| Butylacetat          | —             | ●        |
| Citronsyra           | 10            | ●        |
| Citronsyra           | 10            | ●        |
| Diesel               | —             | ●        |
| Diesel               | —             | ●        |
| Dietylenoxid         | —             | ●        |
| Dietylenoxid         | —             | ●        |
| Eldningsolja         | —             | ●        |
| Eldningsolja         | —             | ●        |

| Kemikalie             | Koncentration | Beständ. |
|-----------------------|---------------|----------|
| Etylacetat            | 100           | ●        |
| Etylacetat            | 100           | ●        |
| Etylalkohol (etanol)  | 96            | ●        |
| Etylalkohol (etanol)  | 96%           | ●        |
| Etylalkohol (etanol)  | 96            | ●        |
| Etylenklorid          | 100           | ●        |
| Etylenklorid          | 100           | ●        |
| Fenol, vattenl.       | ca.9          | ●        |
| Fluorvätesyra         | 40            | ●        |
| Fluorvätesyra         | 40            | ●        |
| Fluorvätesyra         | 40%           | ●        |
| Fosforsyra            | 50            | ●        |
| Fosforsyra            | 50            | ●        |
| Frostskyddsmedel      | —             | ●        |
| Frostskyddsmedel      | —             | ●        |
| Glycerin              | 100           | ●        |
| Glycerin              | 100%          | ●        |
| Glycerin              | 100           | ●        |
| Glykol                | 100           | ●        |
| Glykol                | 100           | ●        |
| Heptan                | 100           | ●        |
| Heptan                | 100           | ●        |
| Isopropylalkohol      | 100           | ●        |
| Isopropylalkohol      | 100           | ●        |
| Isopropylalkohol      | 100%          | ●        |
| Kalciumklorid         | —             | ●        |
| Kalciumklorid         | —             | ●        |
| Kaliumhydroxidlösning | 50            | ●        |
| Kaliumhydroxidlösning | 50            | ●        |
| Klorbensen            | 100           | ●        |
| Klorbensen            | 100%          | ●        |
| Klorbensen            | 100           | ●        |

| Kemikalie                          | Koncentration | Beständ. |
|------------------------------------|---------------|----------|
| Kloroform                          | —             | ●        |
| Kloroform                          | —             | ●        |
| Koldisulfid                        | 100           | ●        |
| Koldisulfid                        | 100           | ●        |
