

# Platta i PP-H 3000x1500x3 mm natur

Artikelnr P1200932

Beständig

Delvis beständig

Ej beständig

| Kemikalie                        | Koncentration | Temp.  | Beständighet |
|----------------------------------|---------------|--------|--------------|
| 1,4-Dioxan                       | 100           | 20 Å°C |              |
| 2-Hydroxipropionsyra (mjölksyra) | 90            | 20 Å°C |              |
| Aceton                           | 100           | 20 Å°C |              |
| Ammoniak                         | â€            | 20 Å°C |              |
| Ammoniumklorid                   | â€            | 20 Å°C |              |
| Amylalkohol                      | â€            | 20 Å°C |              |
| Bensen                           | â€            | 20 Å°C |              |
| Bensin (premium)                 | â€            | 20 Å°C |              |
| Blekningslösning                 | â€            | 20 Å°C |              |
| Borsyra                          | 100           | 20 Å°C |              |
| Bromsvätska                      | â€            | 20 Å°C |              |
| Brännole, aromatfritt            | â€            | 20 Å°C |              |
| Butylacetat                      | â€            | 20 Å°C |              |
| Citronsyra                       | 10            | 20 Å°C |              |
| Cyklohexanon                     | 100           | 20 Å°C |              |
| Cyklohexen                       | 100           | 20 Å°C |              |
| Diesel                           | â€            | 20 Å°C |              |
| Dietylenoxid                     | â€            | 20 Å°C |              |
| Eldningsolja                     | â€            | 20 Å°C |              |
| Etylacetat                       | 100           | 20 Å°C |              |
| Etylalkohol (etanol)             | 96            | 20 Å°C |              |
| Etylenklorid                     | 100           | 20 Å°C |              |
| Fenol, vattenl.                  | ca. 9         | 20 Å°C |              |
| Fluorvätska                      | 40            | 20 Å°C |              |
| Formaldehyd, vattenl.            | 40            | 20 Å°C |              |
| Fosforsyra                       | 50            | 20 Å°C |              |
| Frostskyddsmedel                 | â€            | 20 Å°C |              |

| Kemikalie                          | Koncentration | Temp.  | Beständighet |
|------------------------------------|---------------|--------|--------------|
| Glycerin                           | 100           | 20 Å°C | ●            |
| Glykol                             | 100           | 20 Å°C | ●            |
| Heptan                             | 100           | 20 Å°C | ●            |
| Isopropylalkohol                   | 100           | 20 Å°C | ●            |
| Kalciumklorid                      | â€”           | 20 Å°C | ●            |
| Kaliumhydroxidl sning              | 50            | 20 Å°C | ●            |
| Klor (gas)                         | 100           | 20 Å°C | ●            |
| Klorbensen                         | 100           | 20 Å°C | ●            |
| Kloroform                          | â€”           | 20 Å°C | ●            |
| Koldisulfid                        | 100           | 20 Å°C | ●            |
| Koltetraklorid                     | â€”           | 20 Å°C | ●            |
| Kresol                             | â€”           | 20 Å°C | ●            |
| Linolja                            | â€”           | 20 Å°C | ●            |
| Matolja                            | â€”           | 20 Å°C | ●            |
| Merkurokrom                        | â€”           | 20 Å°C | ●            |
| Metylalkohol (metanol)             | 100           | 20 Å°C | ●            |
| Metylenklorid                      | 100           | 20 Å°C | ●            |
| Metyletylketon (MEK)               | 100           | 20 Å°C | ●            |
| Mineraloljor (aromatfria)          | â€”           | 20 Å°C | ●            |
| Mj lk                              | â€”           | 20 Å°C | ●            |
| Myrsyra                            | 10            | 20 Å°C | ●            |
| Natriumhydroxidl sning (natronlut) | 15            | 20 Å°C | ●            |
| Natriumhydroxidl sning (natronlut) | 60            | 20 Å°C | ●            |
| Natriumkarbonat, vattenl.          | â€”           | 20 Å°C | ●            |
| Natriumklorid, vattenl.            | â€”           | 20 Å°C | ●            |
| Natriumnitrat, vattenl.            | â€”           | 20 Å°C | ●            |
| Natriumtiosulfat                   | â€”           | 20 Å°C | ●            |
| Natriumv tesulfit                  | â€”           | 20 Å°C | ●            |
| Nitrobensen                        | â€”           | 20 Å°C | ●            |
| Oxalsyra                           | â€”           | 20 Å°C | ●            |
| Ozon (gas)                         |     0.5 ppm   | 20 Å°C | ●            |
| Paraffinolja                       | 100           | 20 Å°C | ●            |
| Perkloretylen                      | â€”           | 20 Å°C | ●            |
| Petroleumeter                      | 100           | 20 Å°C | ●            |
