

# Rundstång i PE-1000 150x1000 mm svart

Artikelnr P2200796

● Beständig

● Delvis beständig

● Ej beständig

| Kemikalie                        | Koncentration | Temp.  | Beständighet |
|----------------------------------|---------------|--------|--------------|
| 1,4-Dioxan                       | 100           | 20 Å°C | ●            |
| 2-Hydroxipropionsyra (mjölksyra) | 90            | 20 Å°C | ●            |
| Aceton                           | 100           | 20 Å°C | ●            |
| Ammoniak                         | â€”           | 20 Å°C | ●            |
| Ammoniumklorid                   | â€”           | 20 Å°C | ●            |
| Amylalkohol                      | â€”           | 20 Å°C | ●            |
| Bensen                           | â€”           | 20 Å°C | ●            |
| Bensin (premium)                 | â€”           | 20 Å°C | ●            |
| Borsyra                          | 100           | 20 Å°C | ●            |
| Bromsvätska                      | â€”           | 20 Å°C | ●            |
| Brännole, aromatfritt            | â€”           | 20 Å°C | ●            |
| Butylacetat                      | â€”           | 20 Å°C | ●            |
| Citronsyra                       | 10            | 20 Å°C | ●            |
| Cyklohexanon                     | 100           | 20 Å°C | ●            |
| Cyklohexen                       | 100           | 20 Å°C | ●            |
| Diesel                           | â€”           | 20 Å°C | ●            |
| Eldningsolja                     | â€”           | 20 Å°C | ●            |
| Etylacetat                       | 100           | 20 Å°C | ●            |
| Etylalkohol (etanol)             | 96            | 20 Å°C | ●            |
| Fenol, vattenl.                  | ca. 9         | 20 Å°C | ●            |
| Formaldehyd, vattenl.            | 40            | 20 Å°C | ●            |
| Fosforsyra                       | 50            | 20 Å°C | ●            |
| Frostskyddsmedel                 | â€”           | 20 Å°C | ●            |
| Glycerin                         | 100           | 20 Å°C | ●            |
| Glykol                           | 100           | 20 Å°C | ●            |
| Heptan                           | 100           | 20 Å°C | ●            |
| Isopropylalkohol                 | 100           | 20 Å°C | ●            |

| Kemikalie                          | Koncentration | Temp.  | Beständighet |
|------------------------------------|---------------|--------|--------------|
| Kalciumklorid                      | â€”           | 20 Å°C | ●            |
| Kaliumhydroxidl sning              | 50            | 20 Å°C | ●            |
| Kresol                             | â€”           | 20 Å°C | ●            |
| Linolja                            | â€”           | 20 Å°C | ●            |
| Matolja                            | â€”           | 20 Å°C | ●            |
| Merkurokrom                        | â€”           | 20 Å°C | ●            |
| Metylalkohol (metanol)             | 100           | 20 Å°C | ●            |
| Metylenklorid                      | 100           | 20 Å°C | ●            |
| Mineraloljor, aromatfria           | â€”           | 20 Å°C | ●            |
| Mj lk                              | â€”           | 20 Å°C | ●            |
| Myrsyra                            | 10            | 20 Å°C | ●            |
| Natriumhydroxidl sning (natronlut) | 60            | 20 Å°C | ●            |
| Natriumhydroxidl sning (natronlut) | 15            | 20 Å°C | ●            |
| Natriumkarbonat, vattenl.          | â€”           | 20 Å°C | ●            |
| Natriumklorid, vattenl.            | â€”           | 20 Å°C | ●            |
| Natriumnitrat, vattenl.            | â€”           | 20 Å°C | ●            |
| Natriumtiosulfat                   | â€”           | 20 Å°C | ●            |
| Natriumv tesulfid                  | â€”           | 20 Å°C | ●            |
| Nitrobensen                        | â€”           | 20 Å°C | ●            |
| Oxalsyra                           | â€”           | 20 Å°C | ●            |
| Ozon (gas)                         |     0.5 ppm   | 20 Å°C | ●            |
| Paraffinolja                       | 100           | 20 Å°C | ●            |
| Perkloretylen                      | â€”           | 20 Å°C | ●            |
| Petroleumeter                      | 100           | 20 Å°C | ●            |
| Propylalkohol                      | â€”           | 20 Å°C | ●            |
| Salpetersyra                       | 10            | 20 Å°C | ●            |
| Salpetersyra                       | 50            | 20 Å°C | ●            |
| Saltsyra                           | 10            | 20 Å°C | ●            |
| Saltsyra (konc.)                   | â€”           | 20 Å°C | ●            |
| Silikonolja                        | â€”           | 20 Å°C | ●            |
| Svavelsyra                         | 96            | 20 Å°C | ●            |
| Transformatorolja                  | â€”           | 20 Å°C | ●            |
| Vatten                             | â€”           | 20 Å°C | ●            |
| V teperoxid                        | 10            | 20 Å°C | ●            |

| Kemikalie        | Koncentration | Temp.  | Beständighet |
|------------------|---------------|--------|--------------|
| Xylen            | â€”           | 20 Å°C | <div></div>  |
| Ättika, standard | 5 - 10        | 20 Å°C | <div></div>  |
| Ättiksyra        | 100           | 20 Å°C | <div></div>  |
