

# Rundst ng i PPS 25x3000 mm natur

Artikelnr P1010777

● Best ndig

● Delvis best ndig

● Ej best ndig

| Kemikalie                 | Koncentration | Temp. | Best ndighet |
|---------------------------|---------------|-------|--------------|
| 1,4-Dioxan                | 100           | 20  C | ●            |
| Aceton                    | 100           | 20  C | ●            |
| Ammoniak                  |               | 20  C | ●            |
| Ammoniumklorid            |               | 20  C | ●            |
| Bensen                    |               | 20  C | ●            |
| Bensin (premium)          |               | 20  C | ●            |
| Bromsv  tska              |               | 20  C | ●            |
| Br  nsle, aromatfritt     |               | 20  C | ●            |
| Butylacetat               |               | 20  C | ●            |
| Diesel                    |               | 20  C | ●            |
| Dietylenoxid              |               | 20  C | ●            |
| Etylacetat                | 100           | 20  C | ●            |
| Etylalkohol (etanol)      | 96            | 20  C | ●            |
| Fenol, vattenl.           | 9             | 20  C | ●            |
| Fosforsyra                | 50            | 20  C | ●            |
| Frostskyddsmedel          |               | 20  C | ●            |
| Glycerin                  | 100           | 20  C | ●            |
| Isopropylalkohol          | 100           | 20  C | ●            |
| Kalciumklorid             |               | 20  C | ●            |
| Klorbensen                | 100           | 20  C | ●            |
| Kloroform                 |               | 20  C | ●            |
| Koltetraklorid            |               | 20  C | ●            |
| Metylalkohol (metanol)    | 100           | 20  C | ●            |
| Metylenklorid             | 100           | 20  C | ●            |
| Metyletylketon (MEK)      | 100           | 20  C | ●            |
| Mineraloljor (aromatfria) |               | 20  C | ●            |
| Natriumklorid, vattenl.   |               | 20  C | ●            |

| Kemikalie             | Koncentration | Temp.  | Beständighet |
|-----------------------|---------------|--------|--------------|
| Natronlut (15%)       | 15            | 20 Å°C | <div></div>  |
| Natronlut (60%)       | 60            | 20 Å°C | <div></div>  |
| Perkloretylen         | â€”           | 20 Å°C | <div></div>  |
| Salpetersyra (10%)    | 10            | 20 Å°C | <div></div>  |
| Salpetersyra (50%)    | 50            | 20 Å°C | <div></div>  |
| Saltsyra (10%)        | 10            | 20 Å°C | <div></div>  |
| Saltsyra (konc.)      | â€”           | 20 Å°C | <div></div>  |
| Svavelsyra            | 96            | 20 Å°C | <div></div>  |
| Tetrahydrofuran (THF) | 100           | 20 Å°C | <div></div>  |
| Toluen                | 100           | 20 Å°C | <div></div>  |
| Transformatorolja     | â€”           | 20 Å°C | <div></div>  |
| Trikloreten           | 100           | 20 Å°C | <div></div>  |
| Vatten                | â€”           | 20 Å°C | <div></div>  |
| Xylen                 | â€”           | 20 Å°C | <div></div>  |
