

## PPS 40x3000 mm natur

Artikelnummer: P1010781

## Kemisk beständighet

**A** Utmärkt **B** God **C** Begränsad **D** Ej rekommenderad

| KEMIKALE             | BETYG | KONCENTRATION | TEMPERATUR |
|----------------------|-------|---------------|------------|
| 1,4-Dioxan           | A     | 100%          |            |
| Aceton               | A     | 100%          |            |
| Ammoniak             | A     |               |            |
| Ammoniumklorid       | A     |               |            |
| Bensen               | A     |               |            |
| Bensin (premium)     | A     |               |            |
| Bromsvätska          | A     |               |            |
| Bränsle, aromatfritt | A     |               |            |
| Butylacetat          | A     |               |            |
| Diesel               | A     |               |            |
| Dietylenoxid         | A     |               |            |
| Etylacetat           | A     | 100%          |            |
| Etylalkohol (etanol) | A     | 96%           |            |
| Fenol, vattenl.      | A     | 9%            |            |
| Fosforsyra           | A     | 50%           |            |
| Frostskyddsmedel     | A     |               |            |
| Glycerin             | A     | 100%          |            |
| Isopropylalkohol     | A     | 100%          |            |
| Kalciumklorid        | A     |               |            |
| Klorbensen           | A     | 100%          |            |
| Kloroform            | A     |               |            |

| KEMIKALE                  | BETYG | KONCENTRATION | TEMPERATUR |
|---------------------------|-------|---------------|------------|
| Koltetraklorid            | A     |               |            |
| Metylalkohol (metanol)    | A     | 100%          |            |
| Metylenklorid             | B     | 100%          |            |
| Metyletylketon (MEK)      | A     | 100%          |            |
| Mineraloljor (aromatfria) | A     |               |            |
| Natriumklorid, vattenl.   | A     |               |            |
| Natronlut (15%)           | A     | 15%           |            |
| Natronlut (60%)           | B     | 60%           |            |
| Perkloretylen             | A     |               |            |
| Salpetersyra (10%)        | A     | 10%           |            |
| Salpetersyra (50%)        | D     | 50%           |            |
| Saltsyra (10%)            | A     | 10%           |            |
| Saltsyra (konc.)          | D     |               |            |
| Svavelsyra                | A     | 96%           |            |
| Tetrahydrofuran (THF)     | A     | 100%          |            |
| Toluen                    | A     | 100%          |            |
| Transformatorolja         | A     |               |            |
| Trikloreten               | A     | 100%          |            |
| Vatten                    | A     |               |            |
| Xylen                     | A     |               |            |
